

## Dance Floor Specifications & Tips

All dance floor rental pricing includes installation on clean, level surfaces. For installation on irregular or uneven surfaces such as lawn, or dirt, a plywood subfloor is required at an additional cost. Please note that some floors may be used indoors only.

For exterior floor installations, it is important that flooring be protected from moisture (weather, sprinklers, etc.) since the panels warp easily from moisture. A replacement charge of \$450 per panel will be charged for any damaged panels.

Please refer to the chart below for size recommendations. The recommendations are based on 9 - 10 square feet per couple for standard dancing. These are recommendations only, as dance floor space needs vary with type of dancing and room size. Occupancy is the number of people on the dance floor at one time. We recommend estimating about 40% of your guest will be dancing at one time.

Additional sizes may be available. Please contact us for more information.

<b>Black &amp; White 4' x 4' Sections Indoor Use Only</b>		
Occupancy	Floor Size	# of Panels
14	8' x 8'	4
21	8' x 12'	6
28	8' x 16'	8
